

Xpedimeet, by Amicus provides parties and mediators with a fully supported, web cam mediation solution, allowing parties to complete their mediations and arbitrations, online.

Your Web Cam Mediation Solution

About Xpedimeet

- Xpedimeet is internet based and does not require parties to download software (zero footprint)
- Xpedimeet is available to independent mediators and parties for use with full tech support and assistance to include supplying equipment and the hand holding necessary for new users.
- Xpedimeet is designed for mediation allowing parties to securely, privately caucus and exchange documents or video within the mediation session

Why Webcam Mediation ?

More Settled Cases - Xpedimeet allows you to increase your chances of settling your case by ensuring that all relevant decision makers are able to attend the conference

Lowered Litigation cost - Xpedimeet provides your claims staff with more settlement options by allowing them mediate and settle their impasse cases, pre-suit.

Reduced Time out of the office and travel expense – by attending the mediation on line, staff and management can greatly reduce their time out of the office and cost of travel.

Interested in scheduling an ODR Pilot ?

If you are interested in piloting webcam technology options for your claims staff, we can help. Our pilots include:

- Online (ODR) training for staff
- Tech checks to ensure that all equipment and connections are compatible for online conferencing
- Full scheduling and administration of cases submitted for ADR to include gaining buy in from opposing counsel and assisting them with any technology needs
- Online training and support for selected mediators
- Surveying and reporting of all user feedback as well as measuring the time and expense savings achieved within the pilot
